Re: Notice of Potential Liability at Coakley Landfill, North
Hampton and Greenlanf, New Hampshire.

Dear Mr. Calder:

Please find enclosed the response to the information you requested in your letter dated February 2, 1990 received by this office on February 8, 1990. Enclosed with the response is a number of exhibits pertaining to the matters raised in your letter. We are expecting additional correspondence from the haulers we used during the relevant time frame and will forward these to you as we receive them.

The information that we collected supports our earlier response to an EPA request for information, that no hazardous material generated by Data General Corporation was ever transported to the Coakley Landfill. We will be happy to continue our investigation of this matter if you have any reliable information to the contrary that we can pursue.

Sincerely yours,

William F. Robinson, Jr.
Law Department

DATA GENERAL CORPORATION

RESPONSE TO INFORMATION REQUEST IN NOTICE OF POTENTIAL LIABILITY AT COAKLEY LANDFILL, NORTH HAMPTON AND GREENLAND, NEW HAMPSHIRE DATED FEBRUARY 2, 1990.

During the period from 1972 to 1985 Data General Corporation had three manufacturing facilities in Northeast United States located in Westbrook, Maine; Southboro, Massachusetts and Portsmouth, New Hampshire. Data General Corporation also has manufacturing facilities in Apex, North Carolina and Clayton, North Carolina, both of which disposed of all solid waste and trash in the state of North Carolina. Hazardous wastes were disposed of in a permitted facility in Bornstead South Carolina.

The Company's Westbrook, Maine manufacturing facility is engaged in disk and file assembly work, assembling the parts in disk drives for computer memory, as well as assembly of computer peripherals such as printers. These operations use freon to degrease parts to be assembled but do not create other waste. The Westbrook, Maine manufacturing facility also contains a metal shop for constructing cabinets for computers. These operations include the bending, cutting, cleaning, preparing and painting of metals. These operations result in scrap metals, waste solvents and paint sludge waste.

Since 1988 the Westbrook facility has sold its cardboard and two grades of paper scrap and has always sold the metal scrap. Before 1988 the paper was included in the solid trash. The solvents and paint waste has always been separated and have been treated as hazardous waste and given to a separate hauler. The other solid waste consists of packaging and cafeteria food waste which is collected by the custodial staff for deposit in a trash compactor. The compactor is removed daily for disposal. The solid waste hauler from 1975 (the year the operations were begun) to mid 1988 was Harris Trucking, Mussey Road, Scarborough, Maine who took it for disposal to the Westbrook Municipal Landfill. From mid-1988 to present Harris Trucking has been transporting the solid waste to the Maine Energy Recovery Corporation in Biddeford, Maine. No waste material from the Westbrook manufacturing facility was ever sent to the Portsmouth, New Hampshire manufacturing facility or the Coakley Landfill. (Please see attached Appendix A, B and C).

The Southboro, Massachusetts manufacturing facility began operations in 1975 and had a machine shop which produced prototype equipment for testing as well as computer assembly functions. It had metal plating operations as well as degreasing and painting operations. The plating sludge, paint sludge and solvents produced by these operations have always been kept separate from other wastes and were sent to E.I. DuPont Chamber Works, Deepwater, New Jersey by Franklin Pumping Co. of Franklin, Massachusetts, the transporter. Since 1979 cardboard and two grades of paper waste were kept separate and sold to a recycler. Metal scrap was collected at the Southboro, Massachusetts manufacturing facility and sold to a scrap metal dealer, Wire & Metal Separation Co. of Worcester, Massachusetts who also transported the scrap metal. The container and cafeteria food waste is compacted and E.L. Harvey & Sons Company, Rt. 135, P.O. Box 1243, Westboro, MA 01581 has collected it and taken it to the E.L. Harvey & Sons landfill site at the above

address for more than the past 15 years. No waste material from the Southboro, Massachusetts manufacturing facility was ever sent to the Portsmouth, New Hampshire manufacturing facility or the Coakley Landfill.

The Portsmouth, New Hampshire manufacturing facility began operations in 1976. The facility manufactured printed circuit boards used in the Company's computers. The facility soldered computer chips, small capacitors, resistors, transformers and coils to the printed circuit boards. The waste products from these operations consist of solder dross, spent solder flux, solder oil, TCA and freon degreaser which were collected periodically during the operations. These chemicals as well as the janitorial supplies which were labeled as containing hazardous or toxic chemicals and HVAC (air conditioning) chemicals were then separated and all these liquid wastes and the hazardous solid waste were placed in 55 gallon steel drums for shipment as hazardous waste.

The liquid hazardous waste was collected by Keefe Trucking Co. from 1976 through 1978 and taken to the Keefe site. From 1978 until the closing of the operations in 1990 Northeast Solvents collected the liquid hazardous waste. The solid non-hazardous trash consisting of paper, cardboard, cafeteria and maintenance solids (no liquids) were collected from the Portsmouth facility by Keefe Trucking and taken to the Coakley Landfill from 1976 to 1979. Keefe Trucking was purchased by Great Bay in 1979 who then collected the solid non-hazardous trash from the Portsmouth facility until 1981 when Great Bay was acquired by BFI Waste Haulers, a Brown & Ferris Industries' subsidiary. Great Bay took the non-hazardous solid trash to the Coakley Landfill from 1979 to 1980 when Great Bay began taking all solid trash to the Pease Air Force Base incinerator. BFI Waste Haulers continued to collect the non-hazardous solid trash from the Portsmouth N.H. facility until it ceased operations in 1990. BFI took the non-hazardous trash to the Pease Air Force Base incinerator until the incinerator was closed in 1987 and then took the non-hazardous trash to the Maine Energy Recovery incinerator in Biddeford, Maine. (Please see attached "Response to Request For Information Re: Coakley Landfill Site in North Hampton, New Hampshire" for names, addresses and phone numbers of persons with knowledge of the Portsmouth facility waste practices and procedures, as well as names and addresses of all entities which transported for disposal any of the waste the Company generated.) (Please see attached copies of purchase orders, shipping memos, manifests, and invoices used by the Portsmouth, N.H. facility and representations from haulers.)

Data General Corporation hires outside vendors to collect and disposed of its hazardous waste and its non-hazardous trash. All pick up of waste and trash are performed during the Company's facilities normal business hours. The Company is not aware of the hours during which the waste or solids were subsequently disposed of.

**** APPENDIX "A" ****

TO: DISTRIBUTION
FROM: KEN LAMBERT
DATE: JUNE 12, 1985
SUBJECT: UPDATE - DISPOSAL OF PAINT SLUDGE AT UNION CHEMICAL
REFERENCE: MEMO FROM KEN LAMBERT AND PHIL TWOMBLY CHRONOLOGICAL DETAIL
OF DATA GENERAL PAINT SLUDGE DATED MAY 7, 1985

THE ABOVE REFERENCE MEMORANDUM CONTAINS A PRELIMINARY ANALYSIS OF PURCHASE ORDERS ISSUED TO COVER THE COST OF DISPOSING DATA GENERAL WESTBROOK'S PAINT SLUDGE MATERIAL AT UNION CHEMICAL. THE FOLLOWING TABULATION IS AN UPDATE OF THE DATA OBTAINED THROUGH ANALYSIS OF INTERNAL PURCHASING RECORDS. INFORMATION CAN NOW BE CONSIDERED TO BE RELATIVELY COMPELET DUE TO ANALYSIS OF INTERNAL RECORDS AND VISUAL OBSERVATIONS OF THE UNION CHEMICAL SITE. AN INSPECTION OF THE UNION CHEMICAL SITE WAS CONDUCTED BY DATA GENERAL AND MAINE D.E.P. PERSONNEL ON MAY 10, 1985.

DISPOSAL OF PAINT SLUDGE AT UNION CHEMICAL COMPANY

March 21, 1990

Mr. Steve Lesniak
Skyline Roofing & Sheet Metal
861 Page Street
Manchester, NH 03103

Dear Steve

Subject: Coakley Landfill, Hampton, NH

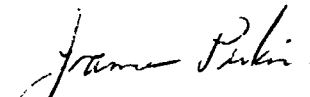

As we discussed today, Data General has been notified the above referenced landfill is designated a superfund site by the EPA.

It is my understanding from our discussions that, to the best of your recollection and belief, Skyline Roofing did some repair work at the Data General Portsmouth facility and that Skyline Roofing did not utilize nor handle any hazardous waste materials. Also, to the best of your recollection and belief Skyline Roofing did not dump any type of waste/trash removed from Data General facilities at the Coakley Landfill site.

Pursuant to this conversation and to indicate you concur with this understanding, kindly sign the below statement and return one signed copy of this letter to me. Because our time frame to respond to the EPA is very short, we would appreciate receiving your response as quickly as possible.

Thank you kindly for your assistance.

Very truly yours,

Mrs. Robert Perkins

Dear Jean,

Subject: Coakley Landfill, Hampton, NH

As we discussed this week, Data General has been notified the above referenced landfill is designated a superfund site by the EPA.

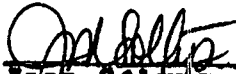

It is my understanding from our discussions that Northeast did not dump any type of waste/trash removed from Data General facilities at the Coakley Landfill site. Pursuant to this conversation and to indicate you concur with this understanding, kindly sign the below statement and return one signed copy of this letter to me. Because our time frame to respond to the EPA is very short, we would appreciate receiving your response as quickly as possible.

Thank you kindly for your assistance.

Mr. Thomas Headon
Safety-Kleen
PO Box 288
Medford, MA 02155

Dear Tom,

Subject: Coakley Landfill, Hampton, NH

As we discussed this week, Data General has been notified the above referenced landfill is designated a superfund site by the EPA.

It is my understanding from our discussions that Safety Kleen did not dump any hazardous waste from Data General facilities at the Coakley Landfill site, but you did not recall whether or not general refuse was dumped at the site. We would appreciate your confirming whether or not any trash/waste from Data General was dumped at the Landfill.

Pursuant to this conversation and to indicate you concur with this understanding, kindly sign the appropriate below statement and return one signed copy of this letter to me. Because our time frame to respond to the EPA is very short, we would appreciate receiving your response as quickly as possible.

Thank you kindly for your assistance.

Very truly yours,

Mrs. Robert Perkins

Telephone: (508) 366-8911

March 21, 1990

Mr. Paul Keefe
437 Washington Road
Rye, NH 03870

Dear Paul,

Subject: Coakley Landfill, Hampton, NH

As you may recall, in August 1988 we discussed services provided for Data General by Keefe Trucking -- at that time Data General was initially notified the above referenced landfill was designated a superfund site by the EPA.

It is my understanding from that discussion that Keefe did NOT dump any type of hazardous waste/trash removed from any Data General facility at the Coakley Landfill site.

As you are aware, I attempted to reach you by phone this past week to review the situation with you, but was advised you were "on the road" and would not return until the weekend. Therefore, because our time frame to respond to the EPA is very short, we are expressing this letter to you. If you have any comments or need to discuss further, please contact either me or Bill Robinson, the attorney handling this matter, sometime Monday, March twenty-sixth.

Phone: 800-999-0418
after you hear the tone, dial
82284784
Direct Line: 508-870-7784

To indicate you concur with this understanding, kindly sign the appropriate statement below and return one signed copy of this letter to me by the enclosed Airborne Express Mail Package.

Thank you kindly for your attention to and assistance in this matter.

Very truly yours,

Mr. George Moczulski
RFE Industries
Fort of Jersey Avenue
Jersey City, NJ 07302

Dear George

Subject: Coakley Landfill, Hampton, NH

As we discussed this week, Data General has been notified the above referenced landfill is designated a superfund site by the EPA.

It is my understanding from our discussions that RFE did not dump any type of waste/trash removed from Data General facilities at the Coakley Landfill site. Pursuant to this conversation and to indicate you concur with this understanding, kindly sign the below statement and return one signed copy of this letter to me. Because our time frame to respond to the EPA is very short, we would appreciate receiving your response as quickly as possible.

Thank you kindly for your assistance.

Very truly yours,
